SUMMARY

Full-stack developer and ASU bootcamp graduate with 1.3k+ npm downloads on a published CLI tool (Forged CLI). Proficient across the full JavaScript ecosystem — React, React Native, Node.js, Express, GraphQL, and multiple database technologies. Experienced with shell automation, GitHub Actions workflows, and CLI development. Background in high-pressure, customer-facing environments brings strong communication, problem-solving, and leadership instincts to every team.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3, Python

Frontend: React, Next.js, React Native, Expo, Tailwind CSS, Zustand, Redux, Bootstrap, Handlebars.js

Backend: Node.js, Express.js, GraphQL, REST APIs

Databases: PostgreSQL, Prisma, MongoDB, MySQL, SQLite, Sequelize, Mongoose

Tools & Platforms: Git, GitHub, Vercel, Render, Railway, Firebase, VS Code, Apollo Studio

Other: JWT, bcrypt, Apollo, Agile, npm publishing, CLI development, GitHub Actions, Playwright

PROJECTS

Forged CLI | weballtech-brandon-kellys-projects.vercel.app

Node.js, TypeScript, npm

- Published CLI tool with 1.3k+ downloads featuring an interactive security scanner, password generator, and README builder
- Built typosquatting detection and tarball integrity validation to flag dangerous installs against trusted publisher registries
- Implemented shell integration layer with single-keybind GitHub workflow (issue > branch > commit > PR), fuzzy command palette, and auto-activating Python/Node environment detection

Kanban | github.com/bkness/kanban | kanban-bkness.vercel.app

React, TypeScript, Zustand, Vercel Functions, PostgreSQL (Neon), Playwright

- Drag-and-drop board with optional accounts and cloud sync; saves carry a version number, so a stale save loads the newer board instead of overwriting it
- Serverless auth API: bcrypt passwords, session tokens stored only as SHA-256 hashes, Postgres-backed rate limiting
- Search, label filters, keyboard shortcuts, collapsible lanes; 36 Playwright end-to-end tests in CI

Night Owlz | github.com/bkness/nightowlz | nightowlz.vercel.app

React Native, Expo, Node.js, MongoDB, Apple MapKit, JWT

- Built cross-platform mobile app with real-time location sharing, JWT authentication, and Apple MapKit integration
- Integrated Apple MapKit JS with OpenStreetMap Overpass fallback for reliable offline-capable map rendering

devlogger | github.com/bkness/devlogger | devlogger-bkness.vercel.app

Next.js, TypeScript, Prisma, PostgreSQL, NextAuth

- Built full-stack developer journal with credentials auth (NextAuth, bcrypt), per-user data isolation, and IP rate limiting on sign-in and registration
- Added tags with click-to-filter, search and sort, weekly stats, and a per-user theme engine saved to the database
- Used Next.js Cache Components with tag-based invalidation and versioned Prisma migrations on serverless Postgres

Game Hub | github.com/bkness/game-hub | game-hub-bkness.vercel.app

MongoDB, GraphQL, Express, React, JWT, Apollo

- Developed full MERN stack app with GraphQL API, JWT authentication, and full Agile workflow
- Architected blog section with GraphQL type definitions, mutations, and testing via Apollo Studio

Breweries | github.com/bkness/breweries | breweries-bkness.vercel.app

Node.js, Express, PostgreSQL, Sequelize, REST API, Handlebars

- Created local brewery finder integrating the Open Brewery DB API with user login, saved favorites, and interactive map view

EXPERIENCE

Bartender | Prescott Resort — Prescott, AZ | July 2025 – Present

- Manage full cocktail service, inventory tracking, and bank reconciliation in a high-volume full-service resort environment

Bartender | Kactus Kates — Cottonwood, AZ | December 2016 – Present

- Independently managed high-volume night shifts with \$2,000–\$3,000 in nightly sales; handled all cash management, closing duties, and building security solo
- Maintained full accountability for end-of-night reconciliation with zero variance across hundreds of shifts

Bartender / Head Bartender | Enchantment Resort — Sedona, AZ | March 2018 – March 2019

- Promoted to Head Bartender at a fine dining resort; oversaw inventory across three outlets and assisted the F&B Manager with wine cellar operations

Gardener | Abundant Organics — Cottonwood, AZ | January 2020 – December 2023

- Advanced from entry-level to salaried position through consistent performance and hands-on expertise
- Achieved 20–40% yield increases through optimized watering schedules, pruning techniques, and soil management

EDUCATION

Full Stack Web Development Certificate | Arizona State University | February 2024

- Intensive full-stack program covering JavaScript, React, Node.js, MySQL, MongoDB, GraphQL, and agile development methodologies
- Graduated with 92.5% overall grade
